Computer-aided Binding System CABS4000S/V

CABS4000S/V Computer-aided Binding System

## Automated/Variable 9-Clamp Perfect Binding System.

The space-efficient CABS4000S/V binder combines high-performance automation, simplicity of operation, superior productivity, and absolute quality control for short, medium and longer run lengths.

#### CABS4000S/V Features

- 1. High productivity at 4,000 books/hour with in-line system from gathering to trimming.
- 2. Color touch screens provide easy, intuitive operation for fast, accurate changeovers and quick adjustments for production flexibility.
- 3. Equipped with interchangeable tank unit that allows binding with both EVA and PUR hotmelt.
- 4. Various book sizes can be bound in-line, from minimum size A6 to maximum size A4.
- Off-line signature gathering is possible using the ST-600 stacker. Also, by installing the RU-600 misfeed unit the gatherer can operate non-stop.
- 6. Quality control image checking cameras, thickness detector, weight checker and other optional quality control features.
- The Horizon bindery management system (pXnet) can also be added, for further to increase in efficiency and effectiveness of the binding process. The pXnet is ready to receive JDF data.

# **MG-600**

## **System Gatherer**

- 1. Combine up to 6 gathering units for a total of 36 stations.
- 2. Intuitive operation via intelligent touch screen control.
- **3.** Image checking cameras (option IC-MG600) detect sheets that have been improperly positioned or misprinted.
- **4.** Used stations and settings of the detecting sensor can be memorized.
- 5. The ST-600 on/off-line stacker allows gathering to be performed off-line from the binder.

#### Option

#### Book block thickness detector (TD-600)

For enhanced quality control, the book block thickness is measured so that only good books proceed to the next steps. Set-up is done through the intuitive touch screen.

#### **Operation section**

Large color touch screens are used on each unit for efficient operation. Settings on a gatherer can be memorized in job memory.

#### Feeding section

Stable paper feeding is provided. Each feed station is equipped with a status indicator lamp.

#### Option

#### Book block rejecting unit (RU-600)

RU-600 rejects any incorrectly collated signatures so the whole system can run non-stop, for maximum productivity.

#### Option

#### **On/Off-line stacker (ST-600)**

The MG-600 can run as a stand alone gatherer when the ST-600 stacker is installed.

#### Option

#### Image checker (IC-MG600)

Image checking camera checks the image on each feed

cycle to prevent incorrect signature or sheet feeding, for absolute document integrity. The captured image is shown on each display for visual confirmation.

#### Option

#### Hand feed unit for MG-600H (HF-600)

HF-600 allows an operator to feed additional signatures or sheets. The MG-600 starts collating when the signature is hand fed, so that both signatures combine smoothly.

# SB-09S/SF, SB-09V/VF

**1.** Highly accurate automated set-up is performed with simple and easy operation.

- 2. Book production of up to 4,000 books/hour can be achieved.
- **3.** Both EVA hotmelt and PUR hotmelt are supported by using the interchangeable melt tanks.
- 4. Two application rollers ensure superior penetration of hotmelt glue.

#### Differences between the four system binders

SB-09S : Semi automated system binder equipped with roller grip style cover feeder. SB-09V : Fully automated variable system binder equipped with roller grip style cover feeder. SB-09SF : SB-09S equipped with rotary grip style cover feeder. SB-09VF : SB-09V equipped with rotary grip style cover feeder.

#### Option

#### Book/Cover sheet size input interface (SI-17)

All necessary setups can be automatically performed by reading the length of the actual book block and cover, instead of having to manually input the size data into the operation panel.

#### **Cover Feeding Section (Selectable)**

Cover feeder is available in two styles. One is a roller grip style feeder and the other is an optional rotary grip style feeder. Rotary grip style is designed to feed flap covers. Any double-feeds are detected by a supersonic sensor. Both feeders are bottom feeding and the cover can be loaded while running for continuous operation.

(SB-09SF, SB-09VF)

Roller Grip feeder (SB-09S, SB-09V)

#### **Cover feeding / Scoring section**

The cover scoring wheels can create up to 4 score lines, and can be automatically set up according to the book thickness.

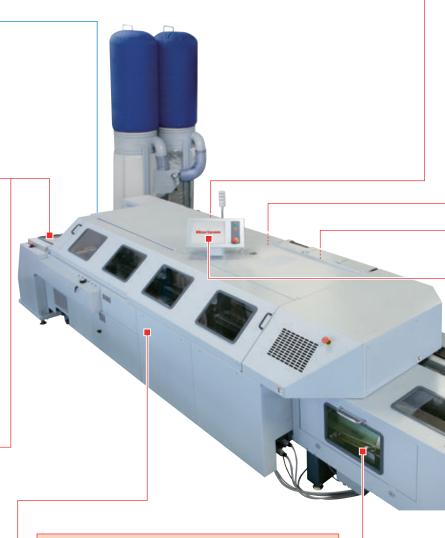

#### **Cover registering / Nipping section**

A superior nipping system experts powerful nip-

ping pressure to create strong,durable binds with sharp spine corners. Automatic nipper height adjustment is available on SB-09V/VF fully automated model.

#### **Delivery section**

The space efficient vertical conveyor and the optional twisting conveyor LD-09T gently lay down and transport the finished book without damaging the spine especially for PUR bound books.

## **Perfect Binder**

#### Melt tank section

Two application rollers promote superior penetration of hotmelt glue into the book for stronger binds. Spine and side glue adjustment is done through the touch screen.

#### **Milling section**

Powerful milling, spine preparation and extraction for strong binding quality. Milling rotation speed is adjustable to suit spine preparation depending on paper quality and binding style.

#### **Carriage clamp**

SB-09S: Clamp opening width according to the book thickness can be adjusted on all clamps using a lever in a range of about 1 cm (0.39").

SB-09V: Clamp opening width can be adjusted automatically according to the book block thickness.

#### **Operation console**

Large color touch screen provides simple and easy operation. All necessary set-ups can be performed through the touch screen.

#### Option

#### **Book block feeder (BBF-SB)**

Sewn book blocks or pre-glued book blocks can be fed into the binder effi-

ciently. BBF-SB increases productivity by improving book block handling and feeding efficiency.

#### In-feed section

Gathered signatures are checked by a height detecting sensor installed on the docking conveyor unit DC-600, and inserted into the clamper while being jogged.

#### Melt tank unit for EVA glue Melt tank unit for PUR glue (Open drum)

Interchangeable melt tanks allow both EVA hotmelt and PUR hotmelt to be used.

#### Option

#### **Pre-melt tank**

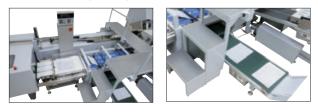

Glue is pre-melted in a separate, high-capacity tank and fed into the glue tank as needed. Pre-melt tanks for EVA hotmelt (PM-20II) and for PUR hotmelt are available.

#### **Connected delivery section**

#### Option

#### Weight checking unit (WD-17)/Book rejecting unit (RU-17)

The weight checking system detects any books that are missing a cover or signature, and delivers the errored books into a reject tray.

#### Option

#### Stack stream unit (SS-110)

Bound books are transported into the stack stream orientator (SS-110) to accumulate a predetermined number of books (up to 100 mm) for trimming in HT-110. SS-110 is set up automatically according to the setting data from HT-110. Fine adjustment is performed through a large touch screen. The speed of the conveyor to HT-110 is also adjusted automatically.

## Three-knife Trimmer

- 1. Highly accurate set-ups are performed with easy and simple operation.
- Trimming cycle can be adjusted in 13 stages from 400 to 1,600 cycles/hour. By accumulating 3 books at once at the stream stack orientator, productivity of 4,000 books/hour can be achieved.
- **3.** Rigid framing and durable structure provides the utmost in trimming accuracy.

#### **Operation console**

The trimmer is simple and easy to operate, with all nec-

essary settings performed through the large, iconbased color touch screen. If the system has an error, the error type and location are indicated for quick resolution.

#### Option

Chip extractor (TB-100)

The three-knife trimming waste is extracted by the chip extractor.

#### **In-Feed section**

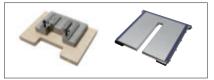

A pressing unit in the in-feed section compresses the books to remove air for reduced bulk and accurate trimming.

#### Option

Plate for trimming for each size

Clamper plate and cutting table for each size are available as options.

#### Chuck plate recognition device

LED lamps light up to indicate which chuck plate is suitable for each book size. Replacement of the chuck plate is fast and easy.

#### **Trimming section**

The height of each knife and the angle of the fore-edge knife can be adjusted through the color touch screen during operation. Trimmings are blown away from the knife by strong air nozzles mounted on the knife holders.

## **Advanced Features**

#### PUR

## Strong, Environmentally Friendly PUR Solution

Polyurethane Reactive, also called PUR, is a polyurethane adhesive attracting attention for binding strength and eco-friendliness.

#### Strong and Lay-Flat Binding

As the printing industry diversifies, there is growing demand for binding with color printed sheets. EVA hotmelt glue has difficulty binding coated stock firmly, and does not currently enable acceptable lay-flat binding. However, PUR hotmelt glue can provide adequate binding strength and lay-flat quality for both offset and digital prints.

PUR hotmelt glue provides the best page spread compared to traditional EVA hotmelt glue. High binding strength allows for the application of a small amount of glue, allowing the pages to lay flat when the book is opened.

#### **Durable against Temperature**

PUR hotmelt glue retains durability and flexibility in both high and low temperatures. The temperature resistance for PUR hotmelt glue ranges from -20 to 120 degrees Celsius versus 0 to 60 degrees Celsius for EVA hotmelt glue. This allows PUR bound books to be handled in almost any climate or location.

#### Ecology

PUR adhesive is environmentally friendly, allowing PUR-bound books to be recycled. PUR also has a lower melting point (120 degrees Celsius) than EVA for operational energy savings.

\*PUR hotmelt is reactive glue and takes time to become solidified. Contact your local dealer about required system components for binding with PUR hotmelt glue.

#### pXnet System

## Manage your bindery with JDF enabled control system.

The Horizon pXnet Bindery Control System is used as a central control point to schedule work, send job data to each finisher, monitor status of finishers and collect production statistics from finishers in real-time. pXnet brings efficiency and value in high-mix/low-volume production environments where frequent job changeovers are needed. The pXnet system can also be interfaced with an existing workflow for automated JDF set-up.

### CABS4000S/V Components

	System Gatherer MG-600				
Model name De		Description	Remarks		
	EU-600	Extra connecting unit	EU-600 is needed between MG-600 and SB-09S when WD-17 is installed.		
	IC-MG600	Image checker	Image checking cameras check the image of each signature to prevent incorrect loading.		
TD-600 Book block thickn		Book block thickness detector	TD-600 detects the thickness of gathered signatures installed on HF-600.		
ST-600		On/Off-line stacker	MG-600 is possible as stand alone .		
RU-600		RU-600 Book block rejecting unit Incorrect signatures are rejected for non-stop operation.			
HF-600		HF-600 Hand feed unit for MG-600H HF-600 allows an operator to hand feed additional signatures or sheets.			
ы	5 DC-600 Docking conveyor unit		DC-600 is connecting unit between MG-600 and SB-09S.		
Selection	CST-600	Connecting unit	CST-600 is docking unit for MG-600 and ST-600 off-line.		
Se	CU-600	Docking conveyor unit	CU-600 is needed when using MG-600 with RU-600 as off-line, but possible to expand to SB-09S on-line.		

					System Binder SB-09S/SF, SB-09V/VF		
	Model name Description		Description	Remarks			
	R-17		17	Connecting belt unit	Connecting unit between MG-600 and SB-09S		
tion		5	S-09S	Automatic feed unit	In-feeder unit for collated book block set		
Selection		ι	J-09S	Manual feed unit	Manual feed unit for collated book block set, not possible to expand to MG-600		
Selection		[	DB-15	Milling blower unit (Single)	Single type milling waste collecting unit		
Selec		D	B-15W	Milling blower unit (Twin)	Twin type milling waste collecting unit		
		PM-	2011	Pre-melt tank	Pre-melt automatic feeding tank for EVA (18 liters) (Contact your local dealer about pre-melt tank for PUR.)		
		CN	-09	Pre-melt tank nozzle	Pre-melt tank nozzle set for SB-09S		
		VS	-17	Smoke extractor unit	Smoke extractor for SB-09S		
		MU-0	9EVA	Melt tank unit for EVA glue	MU-09EVA is used for EVA glue application. (Drum rollers application)		
	MU-09PUR		PUR	Melt tank unit for PUR glue	MU-09PUR is used for PUR glue application (open drum). (Drum rollers application)		
	PH-17		-17	Pre-tank-heater	PH-17 is used to heat up the EVA unit MU-09EVA or PUR unit MU-09PUR for short-make-ready of glue tank change.		
	SI-17		17	Book/Cover sheet size input inter- face	SI-17 measures the book block and cover sizes, and sends the data to SB-09S.		
	Set		LD-09S	Chute delivery conveyor	Chute delivery conveyor for AC-08		
	S		AC-08	Slope conveyor	Length 1.0 m		
ы			LD-09T	Twisting conveyor	Twisting conveyor for SC-17, SCH-15 or HT-110		
Selection	u o	Set	SC-17	Stack conveyor	When not using HT-110, SC-17 is needed as delivery unit.		
လီ	Selection	S	RC-15	Delivery roller conveyor unit (1 m)	Delivery roller conveyor unit for SC-17		
	Se	Set	SCH-15	Delivery stacker	When not using HT-110, SCH-15 is needed as delivery unit.		
		Ň	CV-101	Delivery roller conveyor unit (1 m)	Delivery roller conveyor unit for SCH-15		
		WD	-17	Weight checking unit	WD-17 checks weight of each book.		
		RU	-17	Book rejecting unit	RU-17 rejects a faulty book detected on WD-17.		
		BBF	-SB	Book block feeder	Sewn book block or pre-glued book blocks can be fed into the binder efficiently, eliminating manual feeding.		

Connecting Delivery Section			
Model name	Description	Remarks	
SS-110	Stack stream unit	Bound books are transported into the stack stream orientator (SS-110) to accumulate a predetermined number of books (up to 100 mm) for trimming in HT-110. LD-09T is required.	
KB-09	Bridge	Bridge over delivery section	
KB-17	Bridge	Bridge over delivery section This is needed when MG-600, SB-09S, and HT-110 are connected.	
- Cooling conveyor		Various configurations are arranged depending on space requirements. Longer cooling conveyor is needed when PUR glue application is used.	
CCG-100 Guide for curve conveyor The guide for adjusting position of delivered book on the cooling conveyor		The guide for adjusting position of delivered book on the cooling conveyor	

	Three-knife Trimmer HT-110				
Model name Description		Description	Remarks		
HC-110 Hand feed conveyor		Hand feed conveyor	HC-110 is needed to feed books when HT-110 is used as stand alone. HC-110 is 1.3 m length conveyor and its speed can be adjusted in three phases.		
HCG-100 Hand feed guide set		Hand feed guide set	Guide set for delivered books, installed at the entrance section of HT-110 on the cooling conveyor		
-		Cutting table and clamper plate	Cutting table and clamper plate for each size		
CV-101         Delivery roller conveyor           CVA-100         Delivery extension conveyor		Delivery roller conveyor	CV-101 is 1 m length of Roller conveyor for delivery section HT-110.		
Sele	CVA-100 Delivery extension conveyor		CVA-100 extension conveyor which can be extended from 1.5 m to 3.8 m		
SSP-101 Automat		Automatic silicon spraying system	SSP-101 sprays Silicon to top-Bottom knives to inhibit glue from sticking to the knives while trimming. Recommended to use when PUR glue application is used		
TB-100 Trimming waste extractor unit		Trimming waste extractor unit	TB-100 uses air blowering for the trimming waste.		

- Set : Need to have both unit as a set.

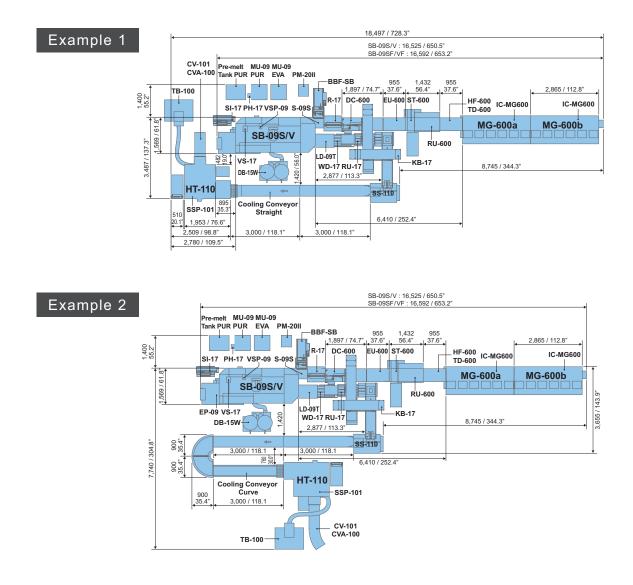

- Selection : Select one of the option.

#### Machine Dimensions and Configuration Examples [Unit : mm / inch]

### Specifications

	MG-600 Specifications		
Sheet Feeding System	Air suction bottom feed		
Module Configuration	MG-600a / MG-600b / MG-600b / MG-600c / MG-600b / MG-600b		
Number of Hopper	6 hoppers / 12 hoppers / 18 hoppers / 24 hoppers / 30 hoppers / 36 hoppers		
Sheet Size	Max. W385 x L275 mm / 15.15" x 10.82" Min. W148 x L105 mm / 5.83" x 4.14"		
Bin Pile Height	Normal paper signature : Max. 300 mm / 11.81" Coated paper signature : Max. 150 mm / 5.90"		
Transport Thickness	Max. 50 mm / 1.96"		
Sheet Weight Range	Normal signature sheet		
Production Speed	Max. 6,000 sets per hour		
Voltage/Frequency	3-Phase 200 V, 50 / 60 Hz 3-Phase 400 V, 50 Hz		
Machine Dimensions	MG-600a : W3,200 x D1,180 x H1,690 mm / 126.0" x 46.5" x 66.6"		
Machine Dimensions	MG-600b/c : W2,860 x D1,180 x H1,690 mm / 112.6" x 46.5" x 66.6"		

SB-09S/SF, SB-09V/VF Specifications					
	Fore-edge Length	Spine L	Spine Length x Fore-edge Length		
		In-line	Portrait	Max. 330 x 250 mm / 12.9" x 9.8" Min. 148 x 105 mm / 5.9" x 4.2"	
Book Block Size		Off- line	Portrait	Max. 400 x 280 mm / 15.7" x 11.0" Min. 148 x 105 mm / 5.9" x 4.2"	
			Land Scape	Max. 330 x 320 mm / 12.9" x 12.5" Min. 135 x 185 mm / 5.4" x 7.3"	
Book Thickness	1 to 45 mm / 0.04" to 1.77" (depending on conditions)				
	~	Spine Length x Fore-edge Length			
Cover Size (Top-Bottom x Fore-edge)		Max. 400 x 660 mm / 15.7" x 25.9" Min. 135 x 220 mm / 5.4" x 8.7"			
Cover Weight Range	Normal Paper : 82 to 302 gsm Coated Paper : 105to 348 gsm SB-09V : 1Folded covers cannot be fed. CF-09VF : 1Folded covers can be fed.				
Cover Pile Height	Max. 130 mm / 5.1"				
Production Speed	Max. 4,000 books per hour				
Voltage/Frequency	SB-09S	3-Phase 200 / 208 V, 50 / 60 Hz			
voltage/Frequency	SB-09V	3-Phase 200 / 208 / 400 V, 50 / 60 Hz			
Machine Dimensions	Stand Alone (with U-09, AC-08): W4,380 x D2,425 x H1,660 mm / 172.4" x 95.5" x 65.4"				
	System (with U-09S) W4,880 x D1,570 x H1,660 mm / 192.1" x 61.9 "x 65.4"				

HT-110 Specifications			
Untrimmed Book Size	1000 BERE LENGT	Spine Length x Fore-edge Length Max. 410 x 320 mm / 16.14" x 12.59" Min. 148 x 105 mm / 5.83" x 4.14"	
Trimmed Book Size	State of the state	Max. 366 x 300 mm / 14.40" x 11.81" Min. 145 x 103 mm / 5.71" x 4.05"	
Trim Width	Fore-edge : 45 mm / 1.77" (Maximum trim width for fore-edge is 23 mm / 0.90" when the finishing size is A4E-Landscape.)		
Trim Height	Top-Bottom : 30 mm / 1.18"         2 to 100 mm / 0.079" to 3.93"         Limitations :         a. Max. 50 mm / 1.96" for books which measure 145 mm / 5.71" or shorter between spine and fore-edge         b. Limitation for books which have a finished length of 325 mm / 12.80" or longer between top and bottom         For example :         Max. 55 mm / 2.16" for books which measure 400 mm / 15.74" between top and bottom before trimming         Max. 80 mm / 3.14" for books which have a length of 364 mm / 14.33" between top and bottom		
Standard Size Trimmed by Standard Accessory	A4/A5 (±3 mm) 8.5" X 11"/ 5.5" X 8.5" (±0.11")		
Clamp System and Pressure	Operated by Servo Motor 4 kN to 12 kN (Adjustable in 9 steps)		
Production Speed	400 to 1,600 cycles (Adjustable in 13 steps)		
Voltage/Frequency	Three Phase 200-230 V, 50 / 60 Hz Three Phase 380-415 V, 50 Hz		
Machine Dimensions	Main Body : W1, 76.8" x 84.7" x 75	950 x D2,150 x H1,910 (including pole lamp) mm 5.2"	
	Power Box : W51	I0 x D1,000 x H1,450 mm / 20.1" x 39.4" x 57.1"
